REPORT  
OF  
Births, Marriages and Deaths  
1909

# REPORT

RELATING TO THE REGISTRATION OF

# Births, Marriages and Deaths

IN THE

PROVINCE OF ONTARIO

FOR THE

Year Ending 31st December,

1909

(Being the 40th Annual Report.)

---

PRINTED BY ORDER OF  
THE LEGISLATIVE ASSEMBLY OF ONTARIO

---

TORONTO:

Printed and Published by L. K. CAMERON, Printer to the King's Most Excellent Majesty  
1911.

TORONTO.

*To His Honour J. MORISON GIBSON,  
Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Fortieth Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario, during the year 1909.

Respectfully submitted,

W. J. HANNA,

*Registrar-General of Ontario.*

SIR:—

I have the honour to submit for your approval the Fortieth Annual Report made in conformity with and under the provisions of The Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1909.

I have the honour to be, Sir,

Your obedient servant,

A handwritten signature in dark ink, reading "John W. McCallough". The signature is written in a cursive style with a prominent flourish at the end.

*Deputy Registrar-General.*

To HON. W. J. HANNA,

*Registrar-General of Ontario.*

# REPORT UPON

# Births, Marriages and Deaths

## FOR THE YEAR 1909

This is the Fortieth Annual Report of Vital Statistics of the Province of Ontario, being for the year ending December 31st, 1909. The percentages are based upon an estimated population of 2,233,264.

There were returned to the Registrar-General by the Division Registrars during the year 109,459 registrations, as follows:

|                 |        |
|-----------------|--------|
| Births .....    | 54,465 |
| Marriages ..... | 22,366 |
| Deaths .....    | 32,628 |

The returns from the County of York, including the City of Toronto, are:

|                 |       |
|-----------------|-------|
| Births .....    | 9,765 |
| Marriages ..... | 4,293 |
| Deaths .....    | 6,202 |

or a total of 20,260, being 17.5 per cent. of those received from the Province.

The following are the returns since 1899:

### VITAL STATISTICS RETURNS FOR ELEVEN YEARS, 1899 TO 1909 INCLUSIVE.

| —           | Births. | Marriages. | Deaths. | Total.    |
|-------------|---------|------------|---------|-----------|
| 1899.....   | 44,705  | 16,514     | 28,607  | 89,826    |
| 1900.....   | 46,127  | 17,107     | 29,494  | 92,728    |
| 1901.....   | 46,061  | 18,035     | 29,608  | 93,704    |
| 1902.....   | 47,796  | 18,072     | 27,864  | 93,732    |
| 1903.....   | 48,642  | 19,830     | 29,664  | 98,136    |
| 1904.....   | 50,265  | 19,789     | 31,290  | 101,344   |
| 1905.....   | 51,911  | 20,426     | 31,371  | 103,708   |
| 1906.....   | 51,710  | 19,846     | 32,782  | 104,338   |
| 1907.....   | 53,584  | 21,915     | 33,502  | 109,001   |
| 1908.....   | 57,155  | 21,058     | 32,714  | 110,927   |
| 1909.....   | 54,465  | 22,366     | 32,628  | 109,459   |
| Totals..... | 552,421 | 214,958    | 339,524 | 1,106,903 |

The registrations of Births are not by any means complete. Parents continue to be negligent in the matter of registering the births of their children. They are in many instances ignorant of how much value such a record may be in the future. Physicians often fail to make the notification required by law. Perhaps in some cases the younger members of the profession are not aware of the law. Steps are being taken to inform them of their duty in this respect.

The registration of Marriages is becoming more perfect year by year.

The registration of Deaths, too, is improving.

It is hoped that the means undertaken by the department will make these returns more perfect in the future.

### BIRTHS.

The total number of births registered was 54,465, being a decrease of 2,690 from the previous year. The rate per one thousand of estimated population is 24.4.

Since the previous report the districts of Manitoulin, Kenora and Sudbury have been removed from Algoma, Nipissing and Rainy River respectively. It is impossible to estimate with any degree of accuracy the population of these new counties, and their population is contained in the tables under their old names. Consequently, the births, marriages and deaths of the old districts seem to have materially decreased, the ratio per one thousand to have abnormally lessened, which is not in reality the case, as these two items would be found to correspond with the returns of former years, where the births, marriages and deaths of the new counties are included in the old districts as in previous years. In the new districts of the Province there is no doubt that the registrations are quite inaccurate, for the reasons that the population, swelled in recent years by the mining, railway and agricultural development of these regions, is now estimated at too low a figure, and that the births are not nearly all registered.

The ratio in counties containing large cities and towns continues in most instances higher than that of rural districts, due, no doubt, to their rapid growth and increase of population.

The French and German settlers contribute more largely to the birth-rate than any other class of our people, judging from the higher ratios in those counties settled by them. In this respect they set a good example to our more purely Canadian people. It has of late years become the fashion to have small families, or none at all. One seeks to assign a reason for the apparent unwillingness of our people to raise larger families. The writer has heard ministers of the gospel, statesmen and patriotic citizens declaim against the so-called "race suicide," but so far has heard of no real encouragement, except that of duty, offered to our womankind to raise more children. The difficulty of securing domestic help, the onerous duties of caring for an increasing family, the attendant expense of properly providing for each new arrival, are matters concerning every mother in the Province. What is offered by those in authority in the way of recompense or encouragement of these mothers? Nothing but a few empty, high-sounding phrases about her duty to the country. To raise healthy children is no doubt an important duty for every mother, but duty becomes tiresome if there is no reward.

The Commonwealth of New Zealand, a progressive nation with a small but almost completely British population, is in this as in other national aims a striking example to the rest of the world. There provision is made by the Government

for the payment to needy mothers of a fixed sum to provide for the expense attending parturition. Were some such plan adopted by this Province, not only would the birth-rate increase, but our present large rate of infant mortality be diminished.

The Government of this Province spends a great deal of money annually for the care of animals; this is commendable.

There is a large sum spent annually for the purpose of inducing immigration from foreign countries, by the Federal as well as by the Provincial Governments. While this policy is necessary in a young country needing increased population, how infinitely of greater importance is it that we should in so far as possible increase and take care of our native born! In the interest of the future of this country there would be no money better spent than that which might be used for these purposes. No asset is of such value to any country of the extent and native wealth of ours than that of healthy children. Anything which will be likely to increase this asset is well worth the most careful consideration.

There were 28,312 males and 26,153 females, or 108 males to every 100 females. The largest number of births occurred in the month of March, and the smallest in December. Of 364 pairs of twins, 345 were males and 383 females.

Of the three cases of triplets, 5 were males, and 4 females. The illegitimate children numbered 745, of whom 434 were males, and 311 females.

#### MARRIAGES.

The 22,366 marriages registered in 1909, represent a ratio of 10 per 1,000, as against 21,915 in 1907, when the rate was 9.8, which was the highest record of the past ten years (Table 5); the average rate for the decade was 8.6. The rate for the immediate past decade was 8.8. The high marriage rates in Nipissing, Algoma, Rainy River and Thunder Bay are more apparent than real, from the fact of the population figures being incorrect; and the same remark applies to Welland, where the opening up of new industries has caused an abnormal increase of population.

The marriage rate also of the County of York, which is 5.3 per 1,000 in excess of the rate for the Province, and 6.1 in excess of the census year 1901, is in error from the fact of the excessive growth of the City of Toronto.

The County of Essex still keeps up its reputation as a marrying county; the number of marriages being 2,508, equal to a rate of 41 per thousand. This extraordinary condition of affairs keeps up from year to year, this year being the largest on record. Analyzing the figures in Table 5, in Essex County for the years 1899 to 1908 inclusive, no less than 16,845 were registered, the county population being 59,660, while during the same years there were registered in York, with a population of 277,994, only 31,129. Many couples come over to Windsor or Sandwich, from Michigan and other States for various reasons, the chief factor being the laxity of the marriage law in this Province, which grants a distinct favor to non-residents as opposed to residents who select the method of publication of banns, rather than that of marriage by license. This favor permits of the license being issued if the applicant makes an affidavit before the issuer where neither party has for the space of fifteen days immediately preceding the issue of the certificate or license had his or her usual place of abode in the county or district in which it is intended that the marriage shall be solemnized, that "the reason for procuring the marriage to be solemnized in the muni-

city is not in order to evade due publicity or for any other improper purpose."

The following remarks from the report of last year continue to apply to the situation so well, that they are repeated herein:—

"Why the restriction is placed upon persons resident in the Province, many, if not most of whom have been born therein, is hard to understand, particularly as the law is one for the people of Ontario and not for non-residents, most of whom belong to a foreign nation. It would be more natural to presume that if marriage is to have any safeguards thrown around it whatever, it would reasonably be against just the class of marriages that is the rule in the portion of Essex County above referred to, persons whom it would be difficult, if not altogether impossible for the Crown to prosecute, should it be found subsequently that the declaration is false in any of its details.

"As to the declaration itself, many of the issuers are engaged in commercial life, often jewellers, who naturally would benefit through the sale of jewellery, particularly rings, which are considered essential, and the signing of the declaration under such conditions to many is a mere formal act and certainly does not carry the weight which otherwise would be attached to it if it were made before a justice of the peace or even a municipal clerk. The subject of the appointment of the issuer is one which in my opinion should also receive consideration."

Classifying the marriages by the denominations of both the brides and grooms, it is found that the first on the list is the Methodist, with 12,765, after which the other denominations follow in the following numerical order: Presbyterian, 9,335; Anglican, 8,146; Roman Catholic, 7,402; Baptist, 2,927; Lutheran, 1,579; Congregationalist, 453; Hebrew, 233; Evangelical Association, 263; Salvation Army, 188.

Of the two means under which clergymen and other authorized persons can perform the marriage ceremony, 19,917 were by license and 2,447 by banns.

In Table 5 will be found the number of marriages registered in each of the counties during the past ten years, with the rate per thousand.

#### DEATHS.

For the year 1909, the number of deaths registered was 32,628, being 86 less than those of the previous year. The death-rate per 1,000 of estimated population is the same as that of last year, viz., 14.6. The total number of deaths in the last ten years is 310,917. The average rate for this period is 13.9 per 1,000. (See Table 6.)

The 19 cities contributed 11,068 deaths.

Of the total deaths, 1,836 were still births, of whom 1,013 were males, 748 females, and 75 of sex not stated. Of the remaining 30,792, there were 16,359 males, 15,143 females, and 38 of sex not stated. March gave the highest mortality (3,158) and June the lowest (2,378).

The deaths from diseases of the respiratory system were the highest in March, being 464, and the lowest in August, 116.

Deaths from diseases of the digestive system were highest in August (658) and lowest in February, 144. Deaths from "General diseases" were nearly level all through the year; the highest being October (with 689) and the lowest in July,

when 535 were reported. Of the 30,792 deaths the ages were not stated in 478 cases, leaving the total number classified under age groups at 30,314. Of these, not including, it will be understood, still-births, the number of deaths in children under one year totals 6,932. Of these 328 died of epidemic diseases, 702 of disease of the respiratory system, 1,510 of disease of the digestive system, 3,038 of other diseases of early infancy, and 406 of ill-defined cases.

#### INFANT MORTALITY.

Further considering the deaths in early infancy, we find that after deducting the still-births (1,836) and the number in which the age is not stated (478) there remain 30,314 deaths. Of these 6,932 are in infants under one year, a death-rate of a little larger than that of last year, being 22.76 per cent. One out of every 8 children born during the year died in the first year of life.

The following tables continue from year to year at much the same rate:—

TABLE OF DEATHS OF INFANTS UNDER ONE YEAR OLD, ALSO BIRTHS FOR THE SAME PERIOD IN ONTARIO, STILL BIRTHS NOT INCLUDED.

| Deaths under 1 year. | Year. | Births. |
|----------------------|-------|---------|
| 5,482                | 1899  | 43,845  |
| 6,212                | 1900  | 45,176  |
| 5,435                | 1901  | 44,953  |
| 4,852                | 1902  | 46,645  |
| 5,435                | 1903  | 47,377  |
| 5,212                | 1904  | 48,575  |
| 6,071                | 1905  | 50,288  |
| 6,867                | 1906  | 50,172  |
| 6,295                | 1907  | 51,838  |
| 6,895                | 1908  | 55,388  |
| 6,932                | 1909  | 52,629  |

TABLE OF DEATHS OF INFANTS UNDER ONE YEAR OLD, ALSO BIRTHS FOR THE SAME PERIOD IN THE CITY OF TORONTO, STILL BIRTHS NOT INCLUDED.

| Deaths under 1 year. | Year. | Births. |
|----------------------|-------|---------|
| 777                  | 1899  | 3,827   |
| 880                  | 1900  | 4,350   |
| 711                  | 1901  | 4,270   |
| 713                  | 1902  | 4,873   |
| 827                  | 1903  | 4,844   |
| 903                  | 1904  | 5,028   |
| 935                  | 1905  | 5,553   |
| 918                  | 1906  | 5,708   |
| 976                  | 1907  | 6,343   |
| 1,215                | 1908  | 7,618   |
| 1,410                | 1909  | 7,531   |

Table 13 shows the *Infant* Mortality under 5 years of age. Excluding still-births, the total is 8,585, or 27.88 per cent. of the total ~~birth~~ <sup>death</sup> rate.

In our sister Province of Quebec this rate is 47 per cent. of the ~~birth~~ <sup>death</sup> rate.

The infant mortality is much larger than it should be. A great deal of it is preventable. There is much necessity for instruction in the matter of care

of infants and young children amongst our people. The majority are intelligent, hardy and vigorous. They would welcome instruction along these lines. It will be the aim of the Provincial Board of Health to, in so far as possible, seek to educate our people in respect to this important matter, and we hope that our efforts in this direction as well as in the case of other preventable diseases, will, before many years are passed, be productive of good results.

It is gratifying to see that the question of medical inspection of schools is being taken up by the Boards of Education of some of our cities. Once the good effect of this is observed, it will not, we hope, be long before the towns and the rural districts will be so impressed by its value that they, too, will establish such inspection. Table 13 shows the number of deaths in the Province of children under 5 years of age by individual diseases.

Of the communicable diseases, Whooping-cough gives 247, Diphtheria 225, Measles 138 and Scarlet Fever 115 deaths.

Simple meningitis accounts for 207, and convulsions 343 deaths. Broncho-pneumonia has 347 and pneumonia 407 deaths. Diarrhoea and enteris (under 2 years) gives the large number of 1,316 deaths, and from 2 years to 5 years 27 deaths.

Diseases of the digestive system, which include the foregoing, total 1,768 deaths. A large number of which are preventable by proper care and feeding of these young children. Recent legislation in respect to milk will, especially in the cities, probably be productive of a better showing before long. There is much to be gained from instruction of the mothers in this important subject of infant feeding.

Typhoid (Enteric fever) caused 669 deaths. This is another of the preventable diseases which might be largely wiped out by due regard to water and milk supplies. The cities suffer most, but here and there in smaller towns there crops up at intervals an unnatural increase in the death-rate from this disease. Of the total number of (669) deaths from typhoid fever there were 199 in cities, none of which were exempt; 88 in towns of over 5,000 population, and 382 in rural districts, Haliburton County being the only one reporting no deaths from this disease.

By greater attention to sanitary matters on the part of the local authorities, aided by the efforts of the Provincial Board, the incidence of typhoid in the mining districts, *e.g.*, Cobalt has been much lessened, with a corresponding loss of life and attendant expense of illness. Municipalities must learn that it is impossible to pour sewage into the source of the water supplies, to allow garbage, manure, and other organic matter to accumulate; in short, to be dirty and expect to escape the consequences.

The deaths from Tuberculosis of all forms numbered 2,380, a death-rate of 1 in 13. Of these 47 were infants under one year.

The following table gives the number of deaths and percentages reported as due to this disease in the Province since 1870:—

TABLE SHOWING DEATHS FROM TUBERCULOSIS, PROVINCE OF ONTARIO, 1870-1909.

| Year.      | Deaths from Tuberculosis. | Decennial Census Population. | Ratio per 1,000 of Population. | Total Deaths from all Causes. | Percentage of Deaths from Tuberculosis in Census Years. |
|------------|---------------------------|------------------------------|--------------------------------|-------------------------------|---|
| 1870.....  | 886                       | 1,620,851                    | .64                            | 6,905                         | 15%   |
| 1871.....  | 1,049                     |                              |                                |                               |   |
| 1872.....  | 1,308                     |                              |                                |                               |   |
| 1873.....  | 1,420                     |                              |                                |                               |   |
| 1874. .... | 1,255                     |                              |                                |                               |   |
| 1875.....  | No returns.               |                              |                                |                               |   |
| 1876. .... | 2,315                     |                              |                                |                               |   |
| 1877.....  | 2,188                     |                              |                                |                               |   |
| 1878.....  | 2,053                     |                              |                                |                               |   |
| 1879.....  | 2,104                     |                              |                                |                               |   |
| 1880.....  | 2,197                     | 1,923,610                    | 1.27                           | 22,821                        | 10%   |
| 1881.....  | 2,446                     |                              |                                |                               |   |
| 1882.....  | 2,591                     |                              |                                |                               |   |
| 1883.....  | 2,667                     |                              |                                |                               |   |
| 1884.....  | 2,506                     |                              |                                |                               |   |
| 1885.....  | 2,499                     |                              |                                |                               |   |
| 1886.....  | 2,573                     |                              |                                |                               |   |
| 1887.....  | 2,556                     |                              |                                |                               |   |
| 1888.....  | 2,551                     |                              |                                |                               |   |

| 1894.....  | 2,379                     |                              |                                |                               |   |
| 1895.....  | 2,472                     |                              |                                |                               |   |
| 1896.....  | 2,922                     |                              |                                |                               |   |
| 1897.....  | 3,164                     |                              |                                |                               |   |
| 1898.....  | 3,291                     |                              |                                |                               |   |
| 1899.....  | 3,405                     |                              |                                |                               |   |
| 1900.....  | 3,484                     | 2,184,144                    | 1.50                           | 29,608                        | 11%   |
| 1901.....  | 3,284                     |                              |                                |                               |   |
| 1902.....  | 2,694                     |                              |                                |                               |   |
| 1903.....  | 2,723                     |                              |                                |                               |   |
| 1904.....  | 2,877                     |                              |                                |                               |   |
| 1905.....  | 2,667                     |                              |                                |                               |   |
| 1906.....  | 2,911                     |                              |                                |                               |   |
| 1907.....  | 2,530                     |                              |                                |                               |   |
| 1908.....  | 2,511                     |                              |                                |                               |   |
| 1909.....  | 2,380                     |                              |                                |                               |   |
| Total...   | 95,301                    |                              |                                |                               |   |

From these figures, which are as accurate as, under existing circumstances, we are able to procure, it would seem that the mortality from tuberculosis is on the decline.

There is an active movement against the disease in most civilized countries. The development of sanatoria, dispensaries and all such agencies, has of late years largely increased.

In the United States in 1904 there were but 183 organizations and institutions of this character. At the present time (April, 1911) there are 1,440. Canada is doing a fair share in this work, there being at this date about 100 institutions for the care of the disease. The anti-tuberculosis movement has increased since 1904 nearly 700 per cent.

## DIPHTHERIA AND CROUP.

The deaths from diphtheria as reported since 1889 are as follows:

|            |       |            |     |
|------------|-------|------------|-----|
| 1889 ..... | 1,101 | 1900 ..... | 738 |
| 1890 ..... | 893   | 1901 ..... | 772 |
| 1891 ..... | 952   | 1902 ..... | 676 |
| 1892 ..... | 890   | 1903 ..... | 687 |
| 1893 ..... | 942   | 1904 ..... | 608 |
| 1894 ..... | 1,075 | 1905 ..... | 503 |
| 1895 ..... | 942   | 1906 ..... | 423 |
| 1896 ..... | 932   | 1907 ..... | 380 |
| 1897 ..... | 976   | 1908 ..... | 450 |
| 1898 ..... | 634   | 1909 ..... | 430 |
| 1899 ..... | 599   |            |     |

The continued decrease in the mortality from this terrible disease is a further testimonial to experimental medicine. The former helplessness and uncertainty in regard to this malady has given way largely to a feeling of confidence in the use of the serum treatment.

As the result of the labors of the Public Health Conference of the Commission on Conservation held in the fall of 1910, a laboratory is about to be established at Ottawa, under the Commission, where various sera are to be manufactured. This will have the effect, it is believed, of not only greatly lessening the present excessive cost of these sera, but, what is more important, of securing a first-class article, which it is feared was not always the case, as at present our physicians are dependent upon foreign makers for their supplies. The present expense of these products is often a serious drain upon the resources of poor people, and often, indeed, upon the generosity of our medical men, who, in numerous instances, as we are well aware, have, rather than see their poorer patients suffer, gone to considerable expense to provide serum for diphtheria cases.

The cases of Whooping-cough, which amongst the laity is not considered a very serious disease, show rather an upward tendency. The figures reported since 1889 are as follows:

|            |     |            |     |
|------------|-----|------------|-----|
| 1899 ..... | 124 | 1905 ..... | 181 |
| 1900 ..... | 185 | 1906 ..... | 240 |
| 1901 ..... | 166 | 1907 ..... | 214 |
| 1902 ..... | 204 | 1908 ..... | 246 |
| 1903 ..... | 204 | 1909 ..... | 262 |
| 1904 ..... | 109 |            |     |

## VENEREAL DISEASES.

Under the head of Syphilis and Gonorrhœa the deaths are 25. Of these 15 will be found in children, 13 being in those under 1 year, and the remaining 2 under 2 years of age. (See Table 13.) Of these, 22 cases occurring in cities, 19 were in Toronto, and one each in Hamilton, Kingston, Belleville, Sarnia, and the remaining two in rural districts of the Province.

Young men and women, too, have altogether too little knowledge of the dangers of these affections and of their disastrous results. It is not an easy subject in which to instruct the youth of our country. The question is of such vital importance to our youth that there should be systematic instruction in our schools about these diseases. At present, practically nothing is told them. How can they be expected to know the dangers!

Herbert Spencer declares that future generations examining our school books in which there is no instruction about the care of children, the duties of parents, etc., will affirm that such books were for the use of celebrities or monastic orders, and not for a virile people intent on propagating their species.

#### CANCER.

The following figures indicate the death-rate from this disease for the last eight years.

During the past 8 years no less than 10,366 persons of all ages have died from various forms of cancer. By years the figures are:—

|      |       |
|------|-------|
| 1902 | 1,048 |
| 1903 | 1,156 |
| 1904 | 1,253 |
| 1905 | 1,224 |
| 1906 | 1,411 |
| 1907 | 1,329 |
| 1908 | 1,348 |
| 1909 | 1,597 |

The deaths as reported by counties will be found in Table 10, while those happening in the cities and towns are contained in Tables 11 and 12.

Of the 308 deaths reported in York County, no less than 259 died in the City of Toronto, and it will be noted that many deaths happen in the cities and towns in which are to be found general hospitals, to which it is naturally to be expected many patients suffering from cancer resort for treatment. So far the labours of various laboratories have been vainly expended in finding the true cause of this disease, which each year continues to add increasing numbers to its death-roll.

#### BRIGHT'S DISEASE.

This affection caused 817 deaths (Table 10), and of this number 304 died in the Cities; 56 in the towns, and the remainder, 457, in the country districts. The death-rate per 1,000 is .25.

#### DEATHS FROM VIOLENCE, ETC.

The ten sub-divisions of this group will be found in Table 10 together with the death totals of each.

In Table 13 are shown the deaths of children under 5 years of age. They number 135.

The deaths from burns in children of this period were 42. They are frequently due to gross carelessness. Their occurrence is regrettable under any circumstances when one considers the suffering endured in accidents of this kind by these innocent little ones.

There were 264 deaths from accidental drowning. Boating accidents on our lakes and other waters furnish the usual annual toll. Many of them are due to the total ignorance manifested in the handling of canoes and other craft.

Fractures and dislocations furnished 178 deaths.

Traumatisms of various kinds caused death in 459 instances. Of these 147 occurred in cities and 37 in towns; the balance, 275, being in the rural districts of the Province.

The increased use of automobiles and electrical conveyances has been responsible for a large number of deaths. It is to be noted, however, that the legislative measures of the Government have been productive of greater care on the part of reckless chauffeurs, and a correspondingly lessened mortality.

There were 117 suicides and 14 homicides.

The work of the various Division Registrars is in almost every instance faithfully performed. I am aware of only one case where any drastic measure was required in the past year. These officials are poorly remunerated. Their service to a municipality is invaluable. They alone are cognizant of the run of the municipal affairs from year to year, and their pay is in most instances totally inadequate for the work they perform. Their advice and assistance is herewith acknowledged.

The work of this branch, thanks to increased help, added to the faithful service of our staff, is, at the time of writing, about eighteen months in advance of that of any former period. Consequently, we hope to have the annual reports after this year issued within the following year.

I desire to express my appreciation of the efforts of the staff in this direction, and for their efficiency in general.

All of which is respectfully submitted.

I have the honor to be, Sir,

Your obedient servant,

JOHN W. S. McCULLOUGH,

*Deputy Registrar-General.*

TABLE No. 1.

Table showing the total number of Births, Marriages and Deaths, and ratio per 1,000 in each County in Ontario, 1909.

| Counties.                              | Estimated<br>Population. | Births. | Ratio per 1,000. | Marriages. | Ratio per 1,000. | Deaths. | Ratio per 1,000. | Total.  |
|--|--------------------------|---------|------------------|------------|------------------|---------|------------------|---------|
| Grand Total.....                       | 2,233,264                | 54,465  | 24.3             | 22,366     | 10.0             | 32,628  | 14.6             | 109,459 |
| *Algoma .....                          | 46,410                   | 757     | 16.3             | 382        | 9.2              | 413     | 8.8              | 1,552   |
| Brant .....                            | 38,992                   | 931     | 23.8             | 325        | 8.3              | 536     | 13.8             | 1,792   |
| Bruce .....                            | 60,347                   | 1,289   | 21.3             | 355        | 5.8              | 706     | 11.6             | 2,350   |
| Carleton.....                          | 99,076                   | 2,515   | 25.3             | 941        | 9.4              | 1,773   | 17.8             | 5,229   |
| Dufferin.....                          | 21,512                   | 368     | 17.0             | 119        | 5.5              | 207     | 9.6              | 694     |
| Elgin .....                            | 44,564                   | 900     | 20.1             | 352        | 7.8              | 527     | 11.8             | 1,779   |
| Essex .....                            | 59,830                   | 1,528   | 25.5             | 2,508      | 41.9             | 830     | 13.8             | 4,866   |
| Frontenac.....                         | 45,536                   | 974     | 21.3             | 366        | 8.0              | 605     | 13.2             | 1,945   |
| Grey .....                             | 71,152                   | 1,484   | 20.8             | 432        | 6.0              | 795     | 11.1             | 2,711   |

\* The great difference between 1908 and 1909 is due to the new Districts of Manitoulin, Sudbury and Kenora being formed from a part of the Districts of Algoma, Nipissing and Rainy River.

† New Districts taken out of the old Districts, as mentioned in above note.

There is no information at hand in regard to their populations. The populations of these places are contained in the populations of Algoma, Nipissing and Rainy River. By accepting the present estimated populations of the older Districts, the number of Births, Marriages and Deaths seems to have materially diminished, and the ratio per 1,000 to have decreased abnormally, which is not in reality the case, as these two items would be found quite normal if the numbers of B., M. and D. of the new Districts were included and the ratio per 1,000 would come back to normal.

TABLE No. 2.

Table showing the total number of Births, Marriages and Deaths, and ratio per 1,000 in each City in Ontario, 1909.

| Cities.             | Estimated<br>Population. | Births. | Ratio per 1,000. | Marriages. | Ratio per 1,000. | Deaths. | Ratio per 1,000. | Total. |

59. Other chronic poisonings.

#### II.—DISEASES OF THE NERVOUS SYSTEM AND OF THE ORGANS OF SPECIAL SENSE.

60. Encephalitis.
61. Simple meningitis.
62. Locomotor ataxia.
63. Other diseases of the spinal cord.
64. Cerebral hæmorrhage, apoplexy.
65. Softening of the brain.
66. Paralysis without specified cause.
67. General paralysis of the insane.
68. Other forms of mental alienation.
69. Epilepsy.
70. Convulsions (non-puerperal).
71. Convulsions of infants.
72. Chorea.
73. Neuralgia and neuritis.
74. Other diseases of the nervous system.
75. Diseases of the eyes and their adnexa.
76. Diseases of the ears.

#### III.—DISEASES OF THE CIRCULATORY SYSTEM.

77. Pericarditis.
78. Acute endocarditis.
79. Organic diseases of the heart.
80. Angina pectoris.
81. Diseases of the arteries, atheroma, aneurysm, etc.
82. Embolism and thrombosis.
83. Diseases of the veins (varices, hemorrhoids, phlebitis, etc.).
84. Diseases of the lymphatic system (lymphangitis, etc.).
85. Hæmorrhage; other diseases of the circulatory system.

#### IV.—DISEASES OF THE RESPIRATORY SYSTEM.

86. Diseases of the nasal fossæ.
87. Diseases of the larynx.
88. Diseases of the thyroid body.
89. Acute bronchitis.
90. Chronic bronchitis.
91. Broncho-pneumonia.
92. Pneumonia.
93. Pleurisy.
94. Pulmonary congestion, pulmonary apoplexy.
95. Gangrene of the lung.
96. Asthma.
97. Pulmonary emphysema.
98. Other diseases of the respiratory system (tuberculosis excepted).

#### V.—DISEASES OF THE DIGESTIVE SYSTEM.

99. Diseases of the mouth and adnexa.
100. Diseases of the pharynx.
101. Diseases of the œsophagus.
102. Ulcer of the stomach.
103. Other diseases of the stomach (cancer excepted).
104. Diarrhœa and enteritis (under 2 years).
105. Diarrhœa and enteritis (2 years and over).
106. Ankylostomiasis.
107. Intestinal parasites.
108. Appendicitis and typhlitis.
109. Hernias, intestinal obstructions.
110. Diseases of the intestines.
111. Acute yellow atrophy of the liver.
112. Hydatid tumor of the liver.
113. Cirrhosis of the liver.
114. Biliary calculi.
115. Other diseases of the liver.
116. Diseases of the spleen.
117. Simple peritonitis (non-puerperal).
118. Other diseases of the digestive system (cancer and tuberculosis excepted).

#### VI.—NON-VENEREAL DISEASES OF THE GENITO-URINARY SYSTEM AND ADNEXA.

119. Acute nephritis.
120. Bright's disease.
121. Chyluria.
122. Other diseases of the kidneys and adnexa.
123. Calculi of the urinary passages.
124. Diseases of the bladder.
125. Diseases of the urethra, urinary abscess, etc.
126. Diseases of the prostate.
127. Non-venerereal diseases of the male genital organs.
128. Uterine hæmorrhage (non-puerperal).
129. Uterine tumor (non-cancerous).
130. Other diseases of the uterus.
131. Cysts and other tumors of the ovary.
132. Salpingitis and other diseases of the female genital organs.
133. Non-puerperal diseases of the breast (cancer excepted).

#### VII.—THE PUERPERAL STATE.

134. Accidents of pregnancy.
135. Puerperal hæmorrhage.
136. Other accidents of labor.
137. Puerperal septicæmia.
138. Puerperal albuminuria and convulsions.
139. Puerperal phlegmasia, alba dolens, embolus, sudden death.
140. Following childbirth (not otherwise defined).
141. Puerperal diseases of the breast.

#### VIII.—DISEASES OF THE SKIN AND OF THE CELLULAR TISSUE.

142. Gangrene.
143. Furuncle.
144. Acute abscess.
145. Other diseases of the skin and adnexa.

#### IX.—DISEASES OF THE BONES AND OF THE ORGANS OF LOCOMOTION.

146. Diseases of the bones (tuberculosis excepted).
147. Diseases of the joints (tuberculosis and rheumatism excepted).
148. Amputations.
149. Other diseases of the organs of locomotion.

#### X.—MALFORMATIONS.

150. Congenital malformations (stillbirths not included).

#### XI.—DISEASES OF EARLY INFANCY.

151. Congenital debility, icterus and sclerema.
152. Other diseases peculiar to early infancy.
153. Lack of care.

#### XII.—OLD AGE.

154. Senility.

#### XIII.—AFFECTIONS PRODUCED BY EXTERNAL CAUSES.

155. Suicide by poison.
156. Suicide by asphyxia.
157. Suicide by hanging or strangulation.
158. Suicide by drowning.
159. Suicide by firearms.
160. Suicide by cutting or piercing instruments.
161. Suicide by jumping from high places.
162. Suicide by crushing.
163. Other suicides.
164. Poisoning by food.
165. Other acute poisonings.
166. Conflagration.
167. Burns (conflagration excepted).
168. Absorption of deleterious gases (conflagration excepted).
169. Accidental drowning.

- 170. Traumatism by firearms.
- 171. Traumatism by cutting or piercing instruments.
- 172. Traumatism by fall.
- 173. Traumatism in mines and quarries.
- 174. Traumatism by machines.
- 175. Traumatism by other crushing (vehicles, railroad, landslides, etc.).
- 176. Injuries by animals.
- 177. Starvation.
- 178. Excessive cold.
- 179. Effects of heat.
- 180. Lightning.
- 181. Electricity (lightning excepted).
- 182. Homicide by firearms.

- 183. Homicide by cutting or piercing instruments.
- 184. Homicide by other means.
- 185. Fractures (cause not specified).
- 186. Other external violence.

XIV.—ILL-DEFINED DISEASES.

- 187. Ill-defined organic disease.
- 188. Sudden death.
- 189. Cause of death not specified or ill-defined.

- 190. XV.—STILL BIRTHS.

BRANT—Concluded.

CAUSES OF DEATH IN THE COUNTY OF GREY, 1909.

[illegible]

40. Cancer and other malignant tumors of the stomach, liver . . . . .

41. Cancer and other malignant tumors of the peritoneum, intestines, rectum . . . . .

42. Cancer and other malignant tumors of the female genital organs . . . . .

43. Cancer and other malignant tumors of the breast . . . . .

45. Cancer and other malignant tumors of other organs and of organs not specified . . . . .

48. Chronic rheumatism and gout . . . . .

50. Diabetes . . . . .

51. Exophthalmic goitre . . . . .

52. Addison's disease . . . . .

53. Leucæmia . . . . .

54. Anæmia, chlorosis . . . . .

56. Alcoholism (acute or chronic) . . . . .

## II.—DISEASES OF THE NERVOUS SYSTEM AND OF THE ORGANS OF SPECIAL SENSE.

**Group Total** . . . . .

61. Simple meningitis . . . . .

62. Locomotor ataxia . . . . .

63. Other diseases of the spinal cord . . . . .

64. Cerebral hæmorrhage, apoplexy . . . . .

65. Softening of the brain . . . . .

66. Paralysis without specified cause . . . . .

68. Other forms of mental alienation . . . . .

69. Epilepsy . . . . .

71. Convulsions of infants . . . . .

73. Neuralgia and neuritis . . . . .

74. Other diseases of the nervous system . . . . .

## III.—DISEASES OF THE CIRCULATORY SYSTEM.

**Group Total** . . . . .

77. Pericarditis . . . . .

78. Acute endocarditis . . . . .

79. Organic diseases of the heart . . . . .

81. Diseases of the arteries, aneurysm, etc. . . . .

82. Embolism and thrombosis . . . . .

83. Diseases of the veins (varices, hæmorrhoids, phlebitis, etc.) . . . . .

## IV.—DISEASES OF THE RESPIRATORY SYSTEM.

**Group Total** . . . . .

89. Acute bronchitis . . . . .

90. Chronic bronchitis . . . . .

91. Broncho-pneumonia . . . . .

92. Pneumonia . . . . .

93. Pleurisy . . . . .

94. Pulmonary congestion, pulmonary apoplexy . . . . .

96. Asthma . . . . .
